

Reduce your Company Risk

Continental Western Group
now offers nationwide **MVR**
Monitoring via Embark Safety.

As a business owner, it is ultimately your responsibility to select, hire, train, supervise, and maintain safe, qualified drivers. Failure to properly investigate employees' driving history increases your business's exposure to direct and vicarious liability, as well as negligent entrustment and retention, which can result in a nuclear verdict for failure to complete your due diligence.

As a leading provider in the Continuous Driver Record Monitoring industry, Embark Safety provides Continental Western Group policyholders with a reliable solution:

DRIVER RECORD MONITORING

A comprehensive Driver Management System that monitors driving records continuously, and notifies you in near real-time whenever there are negative changes, such as suspensions, DUIs, moving violations, accidents, etc*.

For details or specific pricing, please fill out the form at
