

Cloud-Based Risk Management Solutions

SambaSafety, the industry leader in driver risk management, provides a comprehensive Risk Cloud solution that centralizes and normalizes data from multiple sources for a complete picture of driver risk. Companies can now mitigate driver risk with one easy-to-use platform to monitor drivers, interpret driver risk behaviors and incorporate intervention strategies.

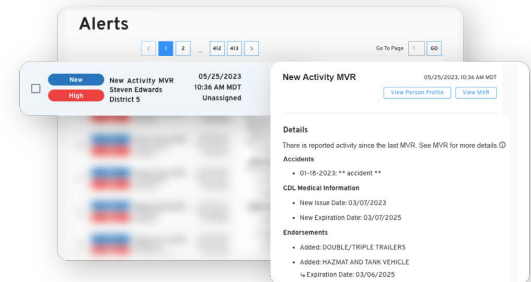

WHY SAMBASAFETY

For over 20 years, SambaSafety has been the industry leader in driver risk management, specializing in driver data, monitoring and training. Through our vaulted records, we have gathered critical insight into the driving population, helping to standardize the enforcement of your driver safety policy by:

- ✓ Combining MVR, CSA, and Telematics data within one platform
- ✓ Delivering timely, automatic violation and suspension alerts throughout the year.
- ✓ Avoiding the costly and time-consuming process of manual MVR pulls
- ✓ Focusing your safety efforts on drivers who require intervention to remain eligible
- ✓ Providing risk trends and insights to prevent future crashes and claims

Customers see up to a 14% reduction in crashes in the first year!

DID YOU KNOW?

- 💡 94 percent of crashes are the result of human behavior
- 💡 3-5 percent of drivers have an invalid license and cause 19 percent of fatalities
- 💡 10 percent of drivers make up 40 percent of annual crash related costs

PRODUCT	DESCRIPTION
MVR MONITORING	Provides continuous monitoring of Motor Vehicle Record (MVRs) violations and CSA inspections. Streamline driver enrollment and better mitigate driving risks. Includes advanced analytics, configurable scoring, and API capabilities, allowing you to leverage dashboards to identify trends, detect changes to a driver's record, benchmark drivers and make data-driven decisions.
ADD-ONS	DESCRIPTION
TRAINING	<p>Defensive Driving includes a suite of eight Defensive Driving courses. Each subscription includes courses for vehicle types: heavy-duty trucks, medium-duty trucks, vans or sedans. The built-in training solution allows easy access to address incoming alerts.</p> <p>Comprehensive Driver Training includes our exclusive suite of courses, covering topics surrounding safety training, defensive driving skills and techniques, post-incident refresher training for common safety violations and regulatory training for heavy-duty trucks. Each subscription includes courses for all driver and vehicle types: heavy-duty trucks, medium-duty trucks, vans and sedans. With our comprehensive platform you can assign, track and export lesson history.</p>
TELEMATICS	Provides aggregated telematics data to build custom criteria for high risk trips or high-risk days. Combining this with the MVR and CSA data captures the complete picture of a driver's risk profile, allowing for more targeted interventions

Improve your Safety Culture
